

PRABESH BASKOTA

IT Support & Systems Administration | Darwin, Northern Territory

+61 422 726 365 | prabeshbaskota8@gmail.com | github.com/s333608 | Full working rights in Australia

PROFESSIONAL SUMMARY

IT graduate from Charles Darwin University with four years of hands-on technical experience across IT support, systems administration, and network troubleshooting. Has independently built and deployed production tools including a help-desk ticketing system, a live threat intelligence bot, and a cybersecurity risk assessment platform. Comfortable working Level 1 and 2 support queues, administering Office 365 environments, and documenting systems for non-technical users. Currently completing the NIT Australia Professional Year Program.

CORE SKILLS

IT Support	Level 1 & 2 Helpdesk, Hardware Troubleshooting, Software Installation, Malware Removal, Remote Desktop Support, Device Setup & Onboarding, User Account Management
Systems & Admin	Windows 10/11, Office 365 (SharePoint, Exchange, Teams, OneDrive), Active Directory basics, Group Policy, Asset Tracking, IT Documentation & SOPs
Networking	TCP/IP, DNS, DHCP, LAN/WAN, Wi-Fi Configuration & Diagnosis, Router/Switch Setup, Wireshark, Network Troubleshooting
Cybersecurity	Vulnerability Scanning, Threat Intelligence APIs (VirusTotal, URLhaus, PhishTank), Security Auditing, Linux Security Tools, Risk Assessment
Ticketing & Tools	Helpdesk Ticketing Systems, Git/GitHub, VS Code, Linux CLI, POS & EFTPOS Systems, Remote Support Tools
Data & Reporting	SQL, Excel, Python (pandas), Data Cleaning, Operational Reporting, Supabase

WORK EXPERIENCE

IT Support Technician | Freelance | Darwin, NT 2021 – Sep 2023

- Handled Level 1 and Level 2 support for individual and small business clients — hardware faults, OS issues, software failures, and connectivity problems.
- Set up user accounts, email systems, and shared drives; performed malware removal, system recovery, and OS reinstalls.
- Diagnosed network issues on-site: Wi-Fi dropouts, router misconfiguration, IP conflicts, and LAN connectivity faults.
- Documented every job — symptoms, steps taken, resolution, and follow-up — building a personal knowledge base used across repeat clients.
- Managed own schedule across multiple concurrent clients, prioritising by urgency and communicating ETAs clearly.

Duty Manager | Darwin Ski Club | Darwin, NT 2021 – Present

- Administer EFTPOS and POS systems across high-volume shifts; first responder for transaction failures, connectivity drops, and till errors.
- Manage shift handover records, incident logs, and compliance documentation — same discipline as IT change logs.
- Onboard and train new staff on internal systems and procedures; write quick-reference guides for non-technical users.
- Coordinate operations for up to 15 staff under time pressure, applying structured triage to competing issues.

Supervisor | Argus Apartments | Darwin, NT

2021 – Jan 2024

- Administered front desk software, reservation platforms, and payment processing tools — handled user access, troubleshooting, and vendor liaison.
- Produced daily operational reports and maintained data records for performance reviews and compliance audits.
- Trained staff on internal systems and wrote step-by-step procedure guides used across the team.

Delivery Driver (Casual) | Wyuna Cold Stores | Darwin, NT

Dec 2024 – Present

- Manages delivery records, route documentation, and scheduling independently, reliable track record across high-volume periods.

TECHNICAL PROJECTS

SENTINEL — Threat Intelligence Bot — *Node.js, Vercel, Supabase, URLhaus, PhishTank, Feodo Tracker* sentinel-bot-tau.vercel.app

- Telegram bot that scans submitted URLs, domains, and IPs against URLhaus, PhishTank, and Feodo Tracker in real time and returns a threat verdict.
- Deployed on Vercel with Supabase logging every query — gives a full audit trail of threat lookups.

CyberShield — Security Risk Assessment Tool — *JavaScript, REST APIs (Currently Offline)*

- Web app that takes an IT environment profile as input and outputs a risk assessment report with prioritised remediation steps.
- Covers common SMB risk vectors: unpatched software, weak credentials, open ports, and misconfigured access controls.

EDUCATION & CERTIFICATIONS

Bachelor of Information Technology

2021 – 2025

Charles Darwin University, Darwin NT — Cybersecurity, Networking, Databases, Data Analysis

Professional Year Program

2025 – Present

NIT Australia, Darwin NT — Industry placement and professional development

Google Foundations of Cybersecurity — Coursera (Nov 2025) | Google Technical Support Fundamentals — Coursera (Nov 2025) | BCG Platinion IT Architecture Job Simulation — Forage (Jan 2026) | CompTIA A+ — In Progress

VOLUNTEER EXPERIENCE

- Top End Gin Festival, Darwin — Event volunteer, 50+ hours
- Nepali Festival Darwin — Event coordination and community support, 200+ hours
- NIT Australia Professional Year Program — Community engagement and professional volunteering, 200+ hours
